OBJECTIVE

Aspiring AI and ML student passionate about solving real-world problems through technology.

EDUCATION

Canara Engineering College <i>Bachelor of Engineering in Computer Science (7.8 CGPA)</i>	Mangalore, India 2023 – 2027
BGS P.U College <i>Pre-University Course - PCMB (83.5%)</i>	Balehonnuru, Karnataka 2021 – 2023

TECHNICAL SKILLS

Programming Languages: Python, SQL, C
Data Analytics: Power BI, Tableau, Pandas, NumPy, Matplotlib
Machine Learning: Machine Learning, Exploratory Data Analysis (EDA), Data Visualization
Database: MySQL
Tools: Jupyter Notebook, Google Colab, VS Code, Git
Core Subjects: Data Structures, Artificial Intelligence, Machine Learning, Computer Networks, Natural Language Processing (NLP)
Soft Skills: Problem Solving, Analytical Thinking, Communication, Teamwork, Adaptability

PROJECTS

- AI Generated Image Detection Using Transfer Learning** | *Python, Xception* Mar. 2026 – Apr. 2026
- Developed a deep learning model using the Xception pre-trained CNN to classify images as real or AI-generated through transfer learning.
 - Preprocessed image data using resizing, normalization, and data augmentation techniques to improve model performance and reduce overfitting.
 - Achieved **85–95% training accuracy** and **80–90% validation accuracy** by fine-tuning the model for binary image classification.
 - Built a simple interface for image upload and real-time prediction with confidence scores.
- Online Doctor Appointment Booking System** | *HTML, CSS, Java, MySQL* Jan. 2024 – Feb. 2024
- Streamlined the appointment booking process, reducing patient waiting time by 50% and minimizing scheduling conflicts by 30% through an automated online system.
 - Developed a doctor schedule management module, improving appointment handling efficiency by 40% and enabling doctors to manage availability and patient records effectively.
 - Automated patient registration, doctor scheduling, appointment booking, and appointment tracking, reducing manual administrative work by up to 60%.
 - Built using HTML, CSS, JSP, Java Servlets, and MySQL, ensuring secure data management, real-time appointment updates, and seamless communication between patients, doctors, and administrators.

ACHIEVEMENTS AND EXPERIENCE

- IBM SkillsBuild (CSRBOX):** Successfully completed a 4-week specialized training program on Agentic AI, gaining hands-on experience in AI Agent Architecture, prompt engineering, and the development of autonomous AI-driven solutions through practical learning and real-world applications.

COURSES AND CERTIFICATES

- Python with TensorFlow:** Completed a comprehensive course covering Python, TensorFlow, machine learning, deep learning, neural networks, and AI model development through hands-on projects.
- One Roadmap Certifications:** Earned certifications in **Data Analyst** and **Data Analyst – Big 4 Ready**, strengthening data analysis, business problem-solving, and industry-ready analytical skills.
- Microsoft Azure Learning Challenge:** Successfully completed the Microsoft Azure Learning Challenge, gaining foundational knowledge of cloud computing and Microsoft Azure services.
